Market Commentary

Global markets rallied for a second day led by the PBOC stimulus package announced yesterday and geo-politics remain on the back seat, hence risk assets are well bid. S&P500 hit a new record high yesterday, gold printed new all-time high and oil is trading with \$70 handle. Equities and front end rates rallied overnight after weak data out of the US also. US consumer confidence missed expectations pointing to labour market weakness, helping the case for further Fed cuts. The September FOMC meeting provided clear confirmation that the Fed's reaction function has now shifted in a more dovish direction. With spreads back to their local tightness, valuation constraints are again binding, leaving carry as the likely dominant component of excess returns. We remain comfortable owning pockets of excess carry and see value in cyclically exposed sectors that have underperformed quarter to date. The slope of the front end of IG spreads curve has remained roughly unchanged this year, a trend we think will persist despite the recent dis-inversion of the yield curve. For the back end, we attribute the recent steepening to the faster-than-expected normalization in the share of 30-year issuance in the primary market. The scope for further re-steepening is, however, limited in our view.

EM credit globally continues to see inflows as investors put cash into work. GCC markets remain resilient though we had a marginal correction in cash prices broadly driven by US rates.

The primary market remains busy, books are open for dual tranche ARAMCO 5y (IPT T+120) and 10y (T+135) sukuk issues where IPTs looks quite wide, however we expect deals to land close to the secondary market curve. Yesterday, Sharjah based Arada real estate developer tapped its 2029 bond with \$150mio size priced at 7.35% with books oversubscribed by 3.2x.

Secondary market flows have picked up this week, flows are balanced and skewed to buying HY and short dated tenor bonds up to 3 years maturity. Our trading volumes continue to be centered around short-dated financials and recent new issues – we traded a clip of short dated EBIUH and a block of BOSUH 29 the recent issue.

Credit spreads remain at YTD lows and we expect it will remain rangebound into month end. The financials space is most active, where we continue to see demand for subordinated and perpetual paper – and as a result Riyadh bank announced a mandate to issue AT1 sukuk with 5.5year call.

TRADE IDEAS | **Cash prices to be updated at time of execution**

(1) FED TRADES: EXTENSIONs IN VOGUE → 4 GCC BANK extension switches...

(1.a) DIB extension switches

- **Client sells DIBUH 5.493% 11/30/27 @ 103.00 z+121, y+4.45%**
- **Client buys DIBUH 5.243% 03/04/29 @ 102.85 z+136, y+4.55%**
 - Client picks 15bps in Z for extending only 15 months
 - Client picks up 0.1% in yield, despite yield curve being flat
 - Client takes out 15c in cash
 - Works 10mm x 10mm

(1.b) GULINT extension switches

- **Client sells GULINT 2.375% 09/23/25 @ 97.65 z+90, y+4.75%**
- **Client buys GULINT 5.75% 06/05/29 @ 105.15 z+135, y+4.55%**
 - Client picks 45bps in Z for extending just under 4 years
 - 11bps a year is too steep for any GCC financial!
 - Client moves into more liquid recent issue
 - Works 10mm x 10mm

(1.c) FABUH extension switches

- **Client sells FABUH 4.581% 01/17/28 @ 101 z+100, y+4.25%**
- **Client buys FABUH 4.779% 01/23/29 @ 102 z+110, y+4.27%**
 - Client picks 10bps in Z for extending 1 year
 - Client moves into more liquid recent issue
 - Client remains within sukuk securities
 - Works 10mm x 10mm

(1.d) EIBUH extension switches

- **Client sells EIBUH 1.827% 09/23/25 @ 97.25 z+75, y+4.62%**
- **Client buys EIBUH 5.431% 05/28/29 @ 104.25 z+125 y+4.42%**
 - Client picks 50bps in Z for just under 4yr extension - one of the steepest curves in the Sukuk space
 - Client moves into more liquid recent issue
 - Works 10mm x 10mm

(2) ADCB CAPITAL STRUCTURE ARBITRADE.... SNR → LT2, pick 80bps!!!

- **Client sells ADCBUH 5.5% Jan 29s @ 104.00, z+110, y+4.47%**
- **Client buys ADCBUH 5.361% Mar 35s LT2 @ 100.80, z+190, y+5.20%**
 - Client moves down capital structure from senior to Subordinated, for a pick-up of 80bps!
 - Client extends 8month in duration when pricing to call (call date: 10-Sep-2029)
 - Client picks up 3/4% in yield
 - Client takes out over 3pts in cash
 - Client moves into smaller, more sought after sub deal
 - Works 10mm x 10mm

(3) ADCB CAPITAL STRUCTURE ARBITRADE.... SNR → T1, pick 165bps!!!

- **Client sells ADCBUH 5.375% Jul 28s @ 103.20, z+105, y+4.45%**
- **Client buys ADCBUH 8.0% PERP @ 107.00, z+270, y+6.10%**
 - Client moves down capital structure from senior to perpetual with a call in Nov 2028, for a pick-up of 165bps!
 - Client remains in same maturity profile
 - Client picks 1.65% in yield!
 - Client gets huge uptick in coupon and hence carry, justifying cash spend at outset of trade
 - Works 10mm x 10mm

(4) BANK ALPHA: ADCB → BSF, pick 20bps in Zsp

- **Client sells ADCBUH 5.50% Jan 29s @ 103.80, YTM 4.50%, Z+105**
- **Client buys BSFR 5.00% Jan 29s @ 101.30, YTM 4.70%, Z+125**
 - Client moves out of expensive Abu Dhabi risk, into KSA
 - Client picks up 20bps in Z spread, ¼% pick up in yield
 - Client takes out 2.5pts in cash
 - Client remains in exactly the same duration & tightening is expected if rates get a decent cut lower
 - Client drops only 1 notch in rating from A to A-
 - Client moves out of conventional to well sought after sukuk paper
 - Works 10mm x 10mm

(5) RISK OFF TRADE IDEA: OMAN SWITCH

- **Client sells OMAN 7.375% Oct 32s @ 114, YTM 5.24%, Z+185**
- **Client buys OMAN 4.750% Jun 26s @ 99.40, YTM 5.10%, Z+132**
 - Client takes out 14.6pts in cash with drop in just 53bp in Zspread
 - Client reduces volatility in portfolio by reducing duration
 - Curve slope (OMAN32-OMAN26) reached extreme level of 53bp, lowest historically (high 140bp)
 - In risk off environment, we expect credit curves to steepen.
 - The best way to express the view is to select high cash price bond. In risk off environment real money tends to raise as much cash as possible to prepare for potential outflows.
 - Works 10x10

(6) UAE ALPHA: UAE → ADGB, pick 8bps in Zsp

- **Client sells UAE 4.917% 33s @ 100.25 z+76**
- **Client buys ADGB 5% 34s @ 100.35 z+84**
 - Client moves from Federal level to ADGB emirate
 - 1 notch uptick in rating from AA- to AA
 - Picks up 8 bps in Z
 - Pick up in liquidity given ADGB is more recent issue
 - ADGB trades inside UAE normally, and will revert in our opinion
 - Works 15mm x 15mm

Credits specific commentary

(1) Overall news flow from Egypt in past few weeks have been positive and reflecting in the fundamentals:

*Asset Sale: During the weekend Egypt made some announcement towards asset sale

- Govt said it would sell the 20% stake in holds in Alex Bank to Intesa Sanpaolo, which already owns 80% in Alex
- The govt also announced that it would sell a stake in United Bank through local IPO in Q1 of 2025
- This can be seen as some progress on asset sales, one of the key reform agenda as demanded by the IMF and others who bailed out the nation
 - Egypt is targeting to raise around \$2bn-\$5bn from asset sale by the end of the current financial year which finishes in in June 2025
 - Indeed, last year the country said it would sale stake in 32 state owned entities ranging from banking and oil to real estate, insurance and ports

*Eurobond issue: According to Bloomberg News, Finance Minister Ahmed Kouchouk told international investors in several in-person meetings in London last week that Egypt is planning to sell dollar debt, or eurobonds, as soon as this fiscal year

- This would be Egypt's first foray into US\$ bond sale since 2021
- As the country was grappling through the fiscal challenges, Egypt took a pause from the mainstream Eurobonds market, but did issue a Samurai bond in 2022 and a Panda bond n 2023 to diversify its sources of funding

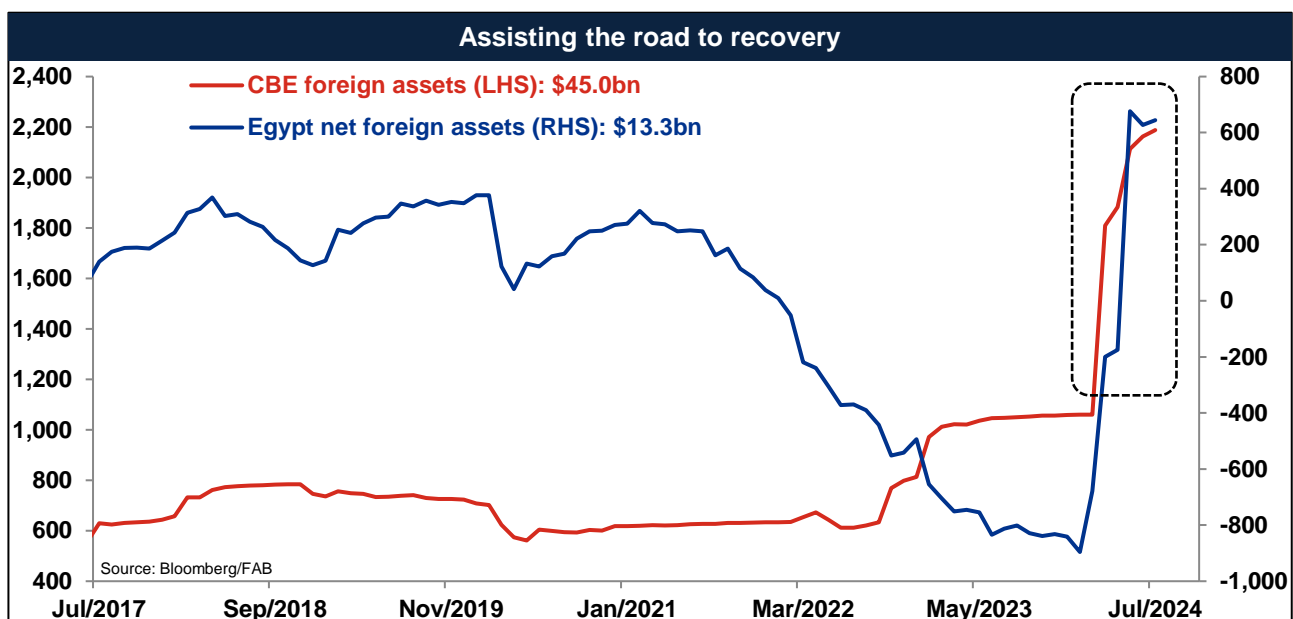

*FDI: On the FDI side also, Egypt is progressing well capitalizing its GCC ties. The credit has already benefitted from last week's news that PIF would invest \$5bn in Egypt. More details have now emerged:

- This \$5bn investment is on top on the support Egypt already received from Saudi - e.g. -
 - The \$5.3bn medium to long-term deposits Saudi has made in Egypt's central bank
 - Saudi also deposited \$5bn in short-term deposits in 2022, which are believed to have been rolled over since then.
- The \$5bn PIF investment is the 1st phase of investment commitments from Saudi, so more investments could follow later
- Egypt also said it has identified and will offer investors 5 new coastal areas sites for development along the Red Sea, including Ras Benas. This is aimed to attract further investments in deals similar to UAE's \$24bn Ras El-Hekma agreement, prime minister Madbouly said last week

*Remittance inflows: On the remittance front, the inflows have increased by 32.4% yoy in the first seven months of 2024 to reach \$15.5bn. The CBE noted that remittances in July 2024 rose for the fifth consecutive month, soaring by 86.8% year-on-year reaching \$3bn

*All these developments are now reflecting positively in Egypt's net foreign assets (NFAs), Fiscal Metrics & Govt Budget

- NFA rose by \$220m in July to reach \$13.3bn
- Its is the third straight month to stay positive, after staying deeply negative for more than two years, until it secured the \$35bn investment deal from UAE in February
- The central bank indeed turned profitable for the first time in seven years, reporting EGP 22.83bn (\$469m) profit for the last fiscal year ending June 2024. The CBE reported a loss of EGP 86.28bn in FY 2022/2023.
- Egypt's FY 2024/2025 Citizen Budget targets GDP growth of 4.2% vs 2.9% growth last fiscal year.
- The budget indeed projects expected total investment in FY 2024/25 to EGP 2tn (\$41bn), saying private sector anticipated to contribute 50% of this total, driven by significant projects such as Ras El Hekma and the implementation of the state ownership policy
- The govt also targets inflation to decline to 18% from current 24-25% level
- As per latest govt data Egypt's central govt debt as % of GDP now declined 91.4% at the end of June 2024, from 95.7% at the end of June 2023
 - External debt as % of GDP now stands at 27.1% down from 25.2% at the end of June 2024
 - Domestic debt as % of GDP declined to 64.3% from 70.5%

Continued...

(2) Saudi Arabia's credit outlook upgraded to "Positive" by S&P and rating was affirmed at 'A':

S&P's upgraded the outlook to positive on Sept 13, citing:

- (2) Strong non-oil growth prospects over the medium term amid wide-ranging reforms and investments to expand the non-oil sector to diversify the economy away from oil; GDP growth could average 4.3% over 2025-2027
- (3) Recalibration of some large infrastructure projects would help to contain pressure on public finances; and the fact that even as the government and wealth fund PIF accumulate higher debt, government will remain in a strong net asset position of above 40% of GDP through 2027
- (4) Economic resilience against ongoing volatility stemming from the hydrocarbon sector

S&P highlighted the below points as key credit strength and driver of the change in outlook:

- Current investments (into the non-oil sector) will spur domestic consumption by the kingdom's over 35 million (largely young) population
- Investments would potentially increase the productive capacity of sectors like manufacturing, logistics, & mining
- Over the longer term, Saudi Arabia will likely emerge as a more diversified economy, with more jobs created for the young population, and broader workforce participation
- Non-oil sector (including government activities) already account for about 70% of GDP
- Significant growth potential for the tourism sector. The sector (constituting both religious and non-religious tourism) currently contributes about 4% of GDP. In 2023, Saudi Arabia's tourist numbers topped that of the G-20 countries and tourism receipts comprised 9% of current account receipts, up from 5% the year before.
- PIF continues to pump \$40bn a year in investments in the local economy toward giga/mega projects including Neom, the Quiddiya entertainment park, and the Red Sea Project
- S&P expects the Saudi economy to grow just 1.4% in 2024, relative to last year's 0.8% contraction, but growth will accelerate to average 4.3% over 2025-2027 with the pick-up in construction for Vision 2030 projects and the services sector, supported by consumer demand and an expanding workforce.
- The newly passed *investment law*, effective from February 2025, seeks to achieve parity between domestic and foreign investors and simplify rules and regulations to make foreign investment more attractive
- Large hydrocarbon reserves and low production costs, alongside large cash buffers at national oil company Saudi Aramco, provide Saudi Arabia some resilience to a global energy transition to low-carbon alternatives
- Dividends from Aramco (including performance-linked dividends) are set at about \$43bn in FY 2024 (nearly 4% of GDP). These exceptional dividends could continue beyond this year given the suspended capex on their maximum sustainable capacity targets

S&P's view on Saudi fiscal metrics:

- (1) Govt to run fiscal deficits of 2%-3% of GDP through 2027, which is expected to average 2.4% over 2024-2027;
- (2) Public investment will be the key driver of government spending growth and fiscal deficits
- (3) Net government asset position will reduce to 44% of GDP in 2027, from around 60% estimated in 2023;
- (4) Gross general government debt rising gradually to about 28% of GDP in 2027, from 22% in 2023
 - a. Govt is mainly targeting external debt issuances through Eurobonds, sukuk, and alternative funding transactions such as project finance
- (5) Current account surpluses averaging 1.2% of GDP over 2024-2027, following a surplus of 3.2% in 2023

S&P said it could upgrade Saudi Arabia's rating in next two years if:

- (1) Ongoing reforms lead to steady growth in GDP per capita;
- (2) GDP growth is supported by continued momentum in non-oil growth
- (3) Institutional landscape in the country strengthens, which could be evident through:
 - a. Effective implementation of the ongoing economic transformation; and
 - b. Development of domestic capital markets

S&P also said it could revise the outlook to stable if it sees:

- (1) Pronounced fiscal weakening, or
- (2) If real per capita GDP growth were to fall relative to its current forecasts
- (3) A material rise in domestic or regional instability

Continued...

Some of the challenges and risk highlighted by S&P are:

- (1) Execution risks to reforms and investments could arise from a sharper fall in oil prices and volumes and the ensuing impact on public finances
- (2) Geopolitical risks from regional instability

(3) Oman's outlook upgraded to "Positive" by Moody's; rating affirmed at Ba1:

Moody's changed the outlook to positive from stable on Aug 29. citing:

- (1) Further improvements in Oman's government debt metrics observed over the past nine months
- (2) Increased likelihood that Oman's fiscal strength could be sustained at a stronger level

Moody's highlighted the below points as key credit strength and driver of the change in outlook:

- Declining debt burden was achieved through the Gov't's prudent fiscal management of the windfall from revenue gains from elevated oil prices
- Govt debt declined by nearly 27% in nominal terms during 2022-2023 and a further 5.6% during the first seven months of 2024
- As a result, Govt debt now reached ~34% of the projected full-year GDP in July 2024, from the peak of 67.9% of GDP in 2020.
- Stock of foreign-currency denominated government debt dropped to 24% of the projected full-year GDP from more than 50% of GDP in 2020.
- Debt reduction over the past two years has been achieved without drawing down its stock of financial assets
- Declining debt burden has expanded the government's fiscal space and strengthened the capacity to absorb unexpected external shocks

- Stronger debt metrics afford the govt additional time to implement further structural reforms and achieve greater economic and fiscal diversification
- The overall gains in fiscal strength indicators appear more sustainable in the medium term

Moody's said it could upgrade Oman's Ba1 rating if it feels more confident that the improvements in govt debt metrics achieved during 2023 can be sustained in the medium term, which could be evidenced through:

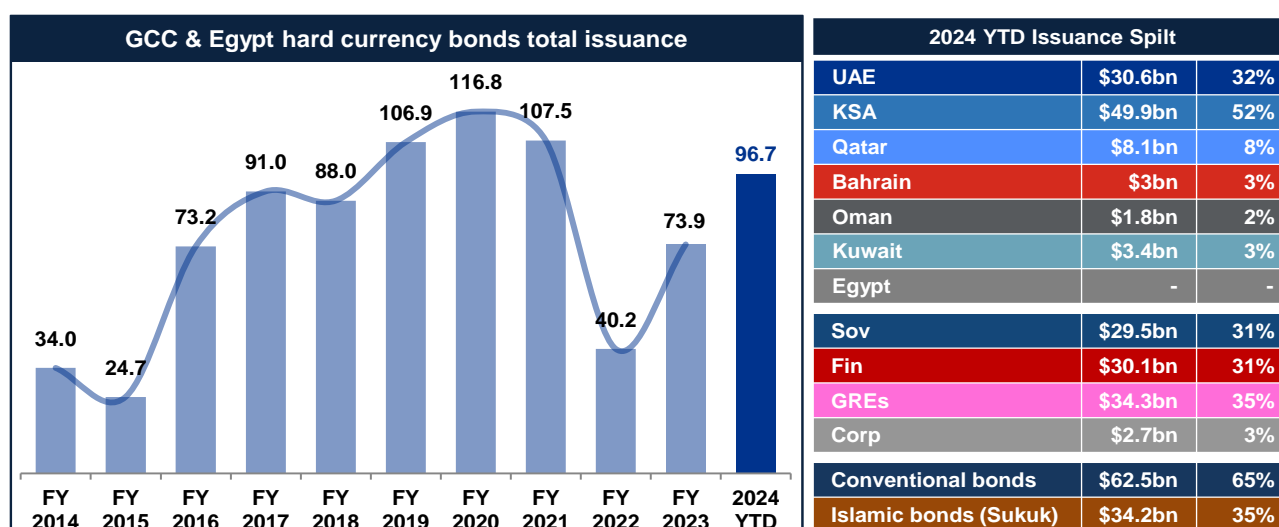

- (1) Combination of declining non-hydrocarbon fiscal and current account deficits
- (2) A further expansion of the government's non-hydrocarbon revenue base
- (3) A trend improvement in non-hydrocarbon sector growth
- (4) A strengthening of the medium-term fiscal planning framework, jointly pointing to gradually diminishing economic and fiscal reliance on the hydrocarbon sector and improving capacity to absorb hydrocarbon revenue shocks.
- (5) In near term, Moody's would like to see the strengthening of the public finance framework through an update of a medium-term fiscal program that clearly outlines the government's spending objectives and its policy reaction function in the face of external shocks and a progress on implementing the mooted personal income tax and by the passing of a 2025 budget that is consistent with a stable or further declining government debt trajectory.

S&P in March this year changed Oman's outlook to 'Positive' and said it could upgrade Oman's BB+ rating over the next 18 months (from April 2024) if Oman's fiscal position strengthens further – e.g. –

- (1) A continued reduction in government debt;
- (2) State-owned enterprise sector continues deleveraging; and
- (3) A stronger economic growth trajectory could also contribute to an upgrade

(4) YTD new issuance from the 'GCC & Egypt' (hard currency bonds) – now reached \$96.7bn and should surpass the \$100bn mark, which would be the fourth time in the regional market's history

- Issuance from Saudi Arabia now accounts 52% of this, taking the figures to \$50bn – that's the highest amount of issuance from KSA ever in a single year, surpassing FY 2023 when it hit \$41bn
 - KSA Sovereign bonds were \$17bn
 - PIF issued \$9.8bn
 - Aramco & Greensaif accounted \$9bn; and
 - Financials have printed around \$10.6bn and expect more to come from them
- UAE issuers raised \$30.6bn this year accounting 32% of the total issuance
- In terms of Sukuk and Conventional split – volume wise the ratio is 65%:35%
- However, by count we have seen 41 Sukuk prints this year (size above \$200m) vs 36 prints last year which was the highest ever for a single year

Note: * Hard currency (US\$, €, £, AU\$, JP¥, CA\$, CHF) bonds and sukuk issuances from the six nations in the GCC and Egypt; This includes both fixed and floating rate issuances of \$100m or above and maturity of 1-year or above; All figures are indicative figures as the analysis is limited by the availability of information from a third-party database; Source: Bloomberg / FAB

Important Notice: This communication has been prepared by individual personnel of First Abu Dhabi Bank PJSC or its affiliates (collectively, “FAB”) and, accordingly, it may not represent the views of FAB. FAB is licensed and regulated by the Central Bank of the United Arab Emirates and its registered office address is P.O. Box 6316, 1 – Al Qurm, Abu Dhabi, the United Arab Emirates. This communication is directed at persons (i) who have been or can be classified by FAB as eligible counterparties, professional clients or sophisticated investors, (ii) who have experience in matters relating to investments and (iii) other persons to whom it may otherwise lawfully be communicated. No other person should review the contents or access the products or transactions discussed in this communication. All material contained herein, including any proposed terms and conditions, is indicative and for discussion purposes only, is subject to change without notice, is strictly confidential, may not be reproduced and is intended for your consideration only. It does not include a number of terms and conditions that will be included in any actual transaction and final terms and conditions are subject to further discussion and negotiation nor does it purport to identify all applicable risks. This is not a commitment to deal in any product, offer financing or enter into any transaction described herein. FAB is not acting as your agent, fiduciary or investment adviser and is not managing your account. The provision of information in this communication is not based on your individual circumstances and must not be relied upon as an assessment of suitability for you of a particular product or transaction. It does not constitute investment advice and FAB makes no recommendation as to the suitability of any of the products or transactions mentioned. Even if FAB possesses information as to your objectives in relation to any transaction, series of transactions or trading strategy, this is not sufficient for, and does not constitute, any assessment of suitability for you of any transaction, series of transactions or trading strategy. Save in those jurisdictions where it is not permissible to make such a statement, FAB hereby informs you that this communication should not be considered as a solicitation or offer to sell or purchase any securities, deal in any product or enter into any transaction. You should make any trading or investment decisions in reliance on your own analysis and judgment and/or that of your independent advisors and not in reliance on FAB and any decision whether or not to adopt any strategy or engage in any transaction will not be FAB’s responsibility. FAB does not provide investment, accounting, tax, financial, legal, regulatory or other advice; such matters as well as the suitability of a potential transaction or product or investment should be discussed with your independent advisors. Prior to dealing in any product or entering into any transaction, you and the senior management in your organization should determine, without reliance on FAB, (i) the economic risks or merits, as well as the investment, accounting, tax, financial, legal and regulatory characteristics and consequences of dealing with any product or entering into the transaction (ii) that you are able to assume these risks, (iii) that such product or transaction is appropriate for a person with your experience, investment goals, financial resources or any other relevant circumstance or consideration. Where you are acting as an adviser or agent, you should evaluate this communication in light of the circumstances applicable to your principal and the scope of your authority. Any prices used herein, unless otherwise specified, are indicative. Although all information has been obtained from, and is based upon sources believed to be reliable, it may be incomplete or condensed, it has not been verified by FAB and its accuracy cannot be guaranteed. FAB makes no representation or warranty, expressed or implied, as to the accuracy of the information, the reasonableness of any assumptions used in calculating any illustrative performance information or the accuracy (mathematical or otherwise) or validity of such information. Any opinions attributed to FAB constitute FAB’s judgment as of the date of the relevant material and are subject to change without notice. Provision of information may cease at any time without reason or notice being given. Commissions and other costs relating to any dealing in any products or entering into any transactions referred to in this communication may not have been taken into consideration. Any scenario analysis or information generated from a model is for illustrative purposes only. Where the communication contains “forward-looking” information, such information may include, but is not limited to, projections, forecasts or estimates of cashflows, yields or return, scenario analyses and proposed or expected portfolio composition. Any forward-looking information is based upon certain assumptions about future events or conditions and is intended only to illustrate hypothetical results under those assumptions (not all of which are specified herein or can be ascertained at this time). It does not represent actual termination or unwind prices that may be available to you or the actual performance of any products and neither does it present all possible outcomes or describe all factors that may affect the value of any applicable investment or product. Actual events or conditions are unlikely to be consistent with, and may differ significantly from, those assumed. FAB shall not be under an obligation to update any information contained in this communication. Illustrative performance results may be based on mathematical models that calculate those results by using inputs that are based on assumptions about a variety of future conditions and events and not all relevant events or conditions may have been considered in developing such assumptions. Accordingly, actual results may vary and the variations may be substantial. The products or transactions identified in any of the illustrative calculations presented herein may therefore not perform as described and actual performance may differ, and may differ substantially, from those illustrated in this communication. When evaluating any forward looking information you should understand the assumptions used and, together with your independent advisors, consider whether they are appropriate for your purposes. You should also note that the models used in any analysis may be proprietary, making the results difficult or impossible for any third party to reproduce. This communication is not intended to predict any future events. Past performance is not indicative of future performance. FAB accepts no responsibility and makes no representation to you or to any third parties for, and has not independently verified, the quality, accuracy, timeliness, continued availability or completeness of any data or calculations contained and/or referred to in this communication and FAB shall not be liable for any special, direct,

indirect, incidental or consequential loss or damage which may be sustained because of the use of the information contained and/or referred to in this communication or otherwise arising in connection with the information contained and/or referred to in this communication, provided that this exclusion of liability shall not exclude or limit any liability under any law or regulation applicable to FAB that may not be excluded or restricted. The transactions and any products described herein may be subject to fluctuations of their mark-to-market price or value and such fluctuations may, depending on the type of product or security and the financial environment, be substantial. Where a product or transaction provides for payments linked to or derived from prices or yields of, without limitation, one or more securities, other instruments, indices, rates, assets or foreign currencies, such provisions may result in negative fluctuations in the value of and amounts payable with respect to such product prior to or at redemption. You should consider the implications of such fluctuations with your independent advisers. The products or transactions referred to in this communication may be subject to the risk of loss of some or all of your investment, for instance (and the examples set out below are not exhaustive), as a result of fluctuations in price or value of the product or transaction or a lack of liquidity in the market or the risk that your counterparty or any guarantor fails to perform its obligations or, if this the product or transaction is linked to the credit of one or more entities, any change to the creditworthiness of the credit of any of those entities. FAB (whether through the individual sales and/trading personnel involved in the preparation or issuance of this communication or otherwise) may from time to time have long or short principal positions and/or actively trade, for its own account and those of its customers, by making markets to its clients, in products identical to or economically related to the products or transactions referred to in this communication. FAB may also undertake hedging transactions related to the initiation or termination of a product or transaction, that may adversely affect the market price, rate, index or other market factor(s) underlying the product or transaction and consequently its value. FAB may have an investment banking or other commercial relationship with and access to information from the issuer(s) of securities, products, or other interests underlying a product or transaction. FAB may also have potential conflicts of interest due to the present or future relationships between FAB and any asset underlying the product or transaction, any collateral manager, any reference obligations or any reference entity. Any decision to purchase any product or enter into any transaction referred to in this communication should be based upon the information contained in any associated offering document if one is available (including any risk factors or investment considerations mentioned therein) and/or the terms of any agreement. Any securities which are the subject of this communication have not been and will not be registered under the United States Securities Act of 1933 as amended (the Securities Act) or any United States securities law, and may not be offered or sold within the United States or to, or for the account or benefit of, any US person, except pursuant to an exemption from, or in a product or transaction, not subject to, the registration requirements of the Securities Act. This communication is not intended for distribution to, or to be used by, any person or entity in any jurisdiction or country which distribution or use would be contrary to law or regulation. FAB may process your personal data to provide you with information or promotional and advertising communications on products, services, other events and campaigns.

If you wish not to receive email from the Market Insights team at FAB, please click [here](#) to send us your request to unsubscribe, and you shall no longer receive such information. You can also let us know by contacting your usual FAB representative should you wish to no longer receive any such further information. You may be entitled according to the applicable laws to exercise your rights to access, to rectification, to erasure and to portability of your personal data, to restrict the use of and to object to the processing of your personal data. You may exercise any such aforesaid rights by sending your request to FAB at the following address: privacy@bankfab.com.
